### **RxNT offers ePrescribing for iPhone**

Networking Technology, Inc. (NTI), the leader in electronic healthcare technology, today announced the release of their much anticipated eprescribing solution for the iPhone. This iPhone app will allow U.S. Licensed prescribers to wirelessly generate prescriptions using high-speed thin client technology.

The application provides all the standard features clients have come to expect from RxNT eRx and RxNT eHr to include real-time eligibility, patient-specific formulary, medication history, and drug utilization review.

“Our clients and the industry have been asking us to create an iPhone solution that is fast, slick, and affordable and we are meeting our client requests”, states Randy Boldyga, President/CEO of RxNT. “This iPhone application can be downloaded free of charge from the Apple app store and can be used along with RxNT eHr or RxNT eRx. Our clients simply choose the best product for their practice.”

#### **About RxNT**

RxNT is a national electronic prescription provider located in Annapolis, Maryland. Our high-caliber product reinforces patient safety by reducing error, drug incompatibility issues, and illegibility. RxNT can be found at [www.rxnt.com](http://www.rxnt.com) or for more information please call us toll free at 800-943-RXNT.
