

RxNT[®]

Electronic Medical Record

Optimizing your practice in one solution package.

Your patient's information at your fingertips

Connect with your patients through patient-centered workflow

For years thousands of physicians have been using the RxNT prescription management system to write tens of millions of prescriptions annually. Those physicians and their staff have encouraged us to develop an Electronic Medical Record (EMR) solution (since they really liked our ePrescribing system). We have responded to their request ...

Introducing RxNT's EMR solution that enables physicians and their clinical staff to document patient encounters, streamline clinical workflow, and securely exchange clinical data.

Features that are available through our EMR solution include:

- Encounters
- ePrescribing
- eLabs
- Charting
- eMessaging
- eReferrals

Optimized with you practice in mind

.....
RxNT's EMR will help streamline your practice workflow, optimize access to patient information, and provide access to real-time data that will offer a higher quality of patient care.
.....

With RxNT's EMR, all of your patient information and records are available online allowing for easy access from multiple points of contact. From visits, medications, labs, medical documentation and their results — each and every valuable piece of information is available to you and your team at all times.

Regain a 360 view of your patients

Discover integration beyond your practice. Our EMR connects you with your patients, lab companies, health plans, and other practices.

It is important to stay closely connected with all aspects of your practice, patients, and partners in the healthcare industry. Our EMR opens new avenues of connectivity with everyone directly linked to your patient to help exchange chart notes, referrals, clinical information, pharmacies, and labs with speed and confidence.

RxNT[®]

A Smarter Way to ePrescribe

Delivering one-point-of-care

RxNT's EMR is specifically designed to meet the informational needs of clinicians by:

- Optimizing patient visits
- Offering a higher level of accuracy and completion of all medical documentation and records
- Allowing more time to focus on patient care
- Reduces costs and improves workflow
- Connectivity with patients, labs, pharmacies, and other practices.

Our EMR solution is the same cost as our ePrescribin solution. That's right, use our 2008 Platinum Certified prescription management solution and when you're ready to upgrade your practice to our EMR solution, there's no need to increase your budget and the transition is smooth and easy.
