RxNT eHr Awarded Gold Solution Provider Status from Surescripts

ANNAPOLIS, Md. – Networking Technology, Inc. (NTI), the leader in electronic healthcare technology, today announced that their electronic health record (eHr) software product received Gold Solution Provider status from Surescripts®. NTI's eHr solution RxNT eHr has achieved Gold Solution Provider status placing their electronic health record solution into an elite group of certified products.

“We are proud to see our electronic health record product become a nationally recognized solution” states Randy Boldyga, CEO of RxNT. “Our eHr solution is cost-effective and robust and we suspect this product will become the cornerstone of our company over the next few years.”

Gold Solution Provider status is granted by Surescripts to vendors with software products that have gone beyond Surescripts baseline product certification to meet benchmarks that demonstrate a higher level of commitment to e-prescribing.

About Networking Technology, Inc.
