Top 10 checklist for your best billing solution

To provide the quality service your clients expect, you need a proven and efficient electronic Medical Billing solution. The right system helps you successfully and quickly turn patient encounters into reimbursements.

Here are the 10 most important features to consider. And by the way, RXNT's billing solution has all 10!

Feature	Why you need it
1. Central Billing Office (CBO) functionality	Manage all encounters from one system. Choose single sign-on (SSO) to have access to all of your clients from one account.
2. Superbill capability	Itemizes a bill to make it easier for the insurance company to process and pay a claim faster.
3. Clearinghouse access	Ensures claims are complete and that procedure (CPT) and diagnostic (ICD-10) codes are valid and in sync with each other before submission to the payer.
4. Claims accuracy checks	Expedite seamless hand-off of electronic claims and real-time status updates that let you quickly check claims and report back to your clients.
5. Custom procedure macros	Creating a macro from frequently paired diagnosis and procedure codes reduces the time needed to generate and submit accurate claims that you regularly bill. And, it ensures full claims details to maximize eligible reimbursement amounts.
6. Electronic Remittance Advice (ERA)	Quickly identify line item errors and update for accuracy in advance. ERA alerts communicate status updates to ensure fast payment turnaround.
7. Online patient bill pay	Allows patients to pay healthcare bills faster and improves patient engagement.
8. Customizable reports	Look for reporting tools to organize and analyze data that's critical for your particular objectives.
9. Mobile charge capture app	Clients enter patient encounters with the correct codes and notations before it comes to you. Most charge capture apps are available on iOS and Android apps.
10. In-house, US-based support team	Less down time when you connect with dedicated US-based representatives. Bonus: interactive guides let you search by topic 24/7 for step-by-step problem resolution.
